

Final Meeting in the Beckman Coulter & IL High Volume Instrumentation & Automation Spring Seminar Series:

Brennan & Company were delighted to host the final seminar of the Beckman Coulter & IL High Volume Instrumentation & Automation in the spring seminar series on 18th April 2007 at the **Brennan & Company Group HQ, in Dublin.** With **presentations** on the day by Beckman Coulter & IL specialists Corin Evans, Stephen Brown, Andy Smith & Kevin Cunningham on the following products recently launched on the Irish Market Place.

Beckman Coulter LH1500 – Complete Automation of the Haematology processes from pre-analytical sorting to automated sample processing and complete automated sample storage and retrieval.

Beckman Coulter LH780 – The newest addition to the range of high throughput systems with new and improved functionalities such as corrected RBC count with high WBC interference automatic correction and automatic enumeration of NRBCs with every CBC/DIFF.

IL ACL TOP – The new high volume, state-of-the-art system provides clotting, chromogenic and immunoturbidimetric testing capabilities with a complete menu of routine and specialty assays and closed tube sampling technology.

Two of the days highlights were the talks by Current users of the systems speaking of their experiences with the system and the practical demonstrations of the both the LH and TOP systems.

For further information on future seminar / study days or for information on our Beckman Coulter or IL products, please contact Sharon Kennedy, Marketing Officer on 01 2952501 or skennedy@brennanco.ie
