

TM-1

Automated Tablet & Capsule Counter

The TM-1 is an accurate and fast counter for retail pharmacies and industrial batch counting applications. It requires no setup or calibration prior to use. Simply press the start button, pour the tablets/capsules through until the desired quantity has been achieved, then dispense the medication into the patient's vial. A display accurately indicates the quantity being counted in real-time. The system also suggests the required vial size in dram units. A simple intuitive interface monitors workflow to ensure that the tray is cleared before each use.

A patented laser scanning sensor at the core of each system is capable of detecting and discerning multiple medicaments simultaneously thereby enabling unparalleled speed and accuracy.

Count Rate: Up to 30 Pills/Tablets Per Second

Maximum Tablet/Pill Size: 20mm x 20 mm (0.78 x 0.78")

Minimum Tablet/Pill Size: 2.8mm Diameter (0.11" Diameter)
