## Swallowing gel

*Banana and Tutti Frutti flavour*

# Difficulty Swallowing?

The expression that something is 'a hard pill to swallow' isn't just a metaphor. Swallowing pills can be difficult, unpleasant and even downright painful for many people.

Some people have a natural aversion to swallowing pills, while others have physical issues affecting their ability to take in oral medication.

The medical term for swallowing problems is dysphagia. Approximately 22% of all adults above the age of 50 and up to 68% for residents in long-term care settings suffer from a difficulty of swallowing – a percentage growing larger with our aging population.

The Severo Swallowing gel is developed in cooperation with the faculty of Food & Biobased Research of the reputable University of Wageningen. With the aim to ease the intake of tablets, capsules and powders for this vulnerable group.

---

*“The swallowing gel makes it considerably easier to take medication. The gel easily mixes with the medication and can be swallowed up in one bite. Because the gel is delivered in a dosing system, you always have the same amount and no loss of gel. The gel is a godsend for clients with swallowing problems!”*

*Argina Rotink, Teamcoach  
at Talma Haven, Urk, The Netherlands*

### Severo – quick and easy

The gel encapsulates the medication, allowing it to effortlessly pass the larynx while simultaneously masking its bitter taste. After swallowing, the gel quickly dissolves in the stomach, this way minimizing the efficacy and uptake of active ingredients by the body. The practical bottle with dose pump makes it ideal for use at home or in any type of care facility. In addition, the gel contains no sugar, alcohol or any common allergenic substances.

# Try Severo Swallowing Gel!

## SEVERO Swallowing gel

- ✓ Eases the swallowing of tablets and powders
- ✓ Quick passage of medication through the throat
