

SEVERO

Electric pill grinder

From pill
to powder
in a few
seconds!

Quick Easy Safe

From pill to powder...

Many people have difficulties swallowing pills. Grinding pills and adding liquid facilitates the intake of medication.

Manually grinding medication is time consuming work, which frequently leads to complaints of physical

pain. There is also a risk of inhaling aerosols from the medication being transformed.

Severo – quick and easy

All of these problems are a thing of the past with the Severo Pill Grinder. It's very simple. Put the medication in the SeveroCup, then place them into the grinder, close the door and within seconds the medication is available in a powder-form. The medication can also be mixed with a liquid using the same SeveroCup.

"We are a nursing home for elderly in need of a lot of care. We used to manually crush the medication. Using the Severo saves a lot of time, and no more wrist and hand complaints. We simply can not work without the Severo."

WZC Westervier, Belgium

“As an early Severo user in Belgium we are very happy with this purchase. The number of absent days caused by wrist injuries is dropped significantly.”

National MS Center Melsbroek, Belgium

Safe and cost effective

Did you know that grinding a Tylenol uses a force of over 21 Kg (46.2 lbs). Electrical grinding is time saving and prevents complaints of physical pain. This means more time for the patients, which is an important profit in a time of increasing patient numbers and tighter economy. Grinding in a closed compartment reduces the risk of inhaling medication powder. Save with the Severo.

Nowadays over 500 Severo machines are used in health care facilities all over Europe.

Free trial

Prevent stress for patients and yourself. Experience the benefits of electrical grinding. Apply today for a free trial. We will send you a Severo within a few days so you can start working with the Severo, or rather the Severo starts working for you!

**...in only
a few seconds!**
