Actico® Cohesive Inelastic Bandage

Effective for patients

Actico® is a short stretch bandage system, meaning it delivers therapeutic working pressures and tolerable resting pressures.

Effective for clinicians

Evidence based:
Actico® has been tried, tested and loved for over 15 years, generating a wide ranging evidence base, including an RCT.

Adaptable:
Actico® offers the solution whether you're treating venous leg ulcers, mixed aetiology ulcers 3,4,5 (ABPI 0.5-0.8)*, chronic oedema or lymphoedema (with or without leg ulcers). *with caution – under specialist supervision.

Safe and easy to apply:

Actico's Safe-Loc® system gives peace of mind for consistently safe, accurate and easy application.

Actico® offers flexible solutions to enable you to treat leg ulcers with or without chronic oedema application.

Effective for chronic oedema:

Use Actico® with Flexiban® or Cellona® Undercast Padding, with more emphasis on padding for shape improvement during effective reduction in limb size, whilst improving limb proportion. Can be applied as a below knee or full leg bandage.

Effective for venous leg ulcers:

Use Actico® with Flexiban® or Cellona® Undercast Padding, to protect bony prominences, tendons and fragile tissue, whilst providing effective compression to promote ulcer healing.

Sizes & Ordering Codes

Size	Order Code
12cm x 6m	88311
10cm x 6m	88310
8cm x 6m	88309
6cm x 6m	88308
4cm x 6m	88307

Why choose Actico®?

System chosen should...	Consider whether the bandage system...	Actico®
Encourage safe and accurate application.	Is the correct size for the patient's ankle circumference? **Is easy to apply?** Can be applied accurately and consistently by all those involved in care?	✓
Encourage patient comfort.	Allows the patient to wear appropriate footwear and clothing. Is comfortable and conformable, which encourages patient mobility and confidence.	✓
Be capable of maintaining pressure and be non slip.	Is likely to stay in place, not slip and can be adapted to cope with limb distortion at the next dressing change. Can be adapted to suit limb shape.	✓

Actico® 2C Two component leg ulcer kit

Actico®2C is a two component leg ulcer kit consisting of:

- Layer 1 - a skin friendly comfort layer applied directly to the skin to distribute the compression evenly.
- Layer 2 - an inelastic cohesive compression layer for therapeutic effective compression.
- Latex-free.
- Safe-Loc' system - for consistently safe, accurate and easy application - 'Lock & Roll'.

Sizes & Ordering Codes

Size	Kit contains	Order Code
Actico®2C - 18-25cm kit	Actico®2C Comfort Layer 1 10cm x 3.5m Actico®2C Compression Layer 2 10cm x 6m	31770
Actico®2C - 25-32cm kit	Actico®2C Comfort Layer 1 10cm x 3.5m + 10cm x 2m Actico®2C Compression Layer 2 10cm x 9m	31771
Actico®2C Comfort Layer 1	10cm x 3.5m	31772
Actico®2C Comfort Layer 2	10cm x 6m	31773

Actifast® 2 way stretch tubular retention

The versatile ActiFast® 2 way stretch tubular bandage range is easy to apply and can be cut to size and shape.

The ActiFast® range is safe to use where compression is contra-indicated.

Please note:

When a measurement overlaps, always use the larger size.

The lowest priced 2-way stretch tubular retention bandage on Drug Tariff*

*Cost comparison Drug Tariff August 2017.
*Average reduction of usage in testing against ActiFast® original one way stretch tubular bandage as a result of 'Cut To Fit'.

Activa® Leg Ulcer Hosiery Kits

Hosiery Kits are an alternative to bandages for healing leg ulcers.

Two garments are worn one on top of the other. A 10mmHg liner followed by higher a compression stocking.

- Optimal 40mmHg* compression for effective VLU healing.
- Simple to apply consistently and safely.
- Requires minimal training and can be reapplied by the patient, carer and other members of the multi-disciplinary team.

Flexiban® Padding Bandage

- For protection of exposed bones and nerves under plaster of Paris or synthetic casts.
- Padding underneath splints, zinc paste bandages (Unna's boot), adhesive bandages and compression bandages.
- In wound care: as an airpermeable padding material in combination with textile wound dressings or paraffin gauze dressings.

Size	Order Code	Units Per Pack
10cm x 3.5m	88572	12

Debrisoft® for debridement

Debrisoft® Lolly

Ideal for cavity wounds or hard to rech areas (e.g. diabetic foot ulcers, deep pressure ulcers).

Debrisoft® Duo (10cm x 10cm)

The original soft, white side removes debris, exudate and biofilm from the wound. The new textured beige side makes it easy to loosen firmly adherent, fibrinous slough*.

Debrisoft® Duo (13cm x 20cm)

This new bigger size is ideal for larger wounds or areas of hyperkeratosis that may be associated with severe oedema.

Debrisoft® and Debrisoft® Lolly Ordering Information

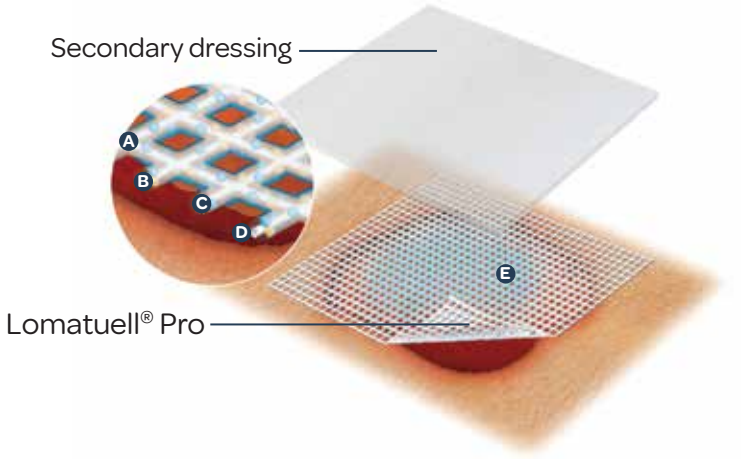

Size	Order Code	Units Per Pack
Debrisoft® 5 x 1.9 x 15.5	33224	5
Debrisoft® Duo 10 x 10	159990	5
Debrisoft® Duo 13 x 20	159991	5

*Based on in vitro data.

Lomatuell® Pro Gel forming wound contact layer

- Gel formation supports moist wound healing.
- Dressing charges are atraumatic[1].
- Effective transfer of exudate into the secondary dressing.
- May be used in combination with controlled negative pressure therapy[2].
- Less disturbance of the wound bed: intervals between dressing changes may be extended.
- Conforms well to the contours of the wound bed.

- Ⓐ **Polymer matrix** elastic, malleable fixing compound, olds petroleum jelly and hydrocolloids in the wide-mesh tulle.
- Ⓑ **Petroleum jelly** moisturises dry wound areas and wound edge.
- Ⓒ **Hydrocolloid** moisturises dry wound areas and wound edge.
- Ⓓ **Open-mesh tulle** carries the polymer matrix and allows transfer of exudate.
- Ⓔ **Gel formation.**

Sizes & Ordering Codes

Lomatuell® Pro Gel forming wound contact net (individually sealed and sterile)

Size (cm)	Order Code	Pack Contains
5 x 5	30870	10
10 x 10	30871	10
10 x 20	30872	10
10 x 30	30873	10

1. LR Data on file, PB FE N-1945/2012
2. Wolber S, et al. International multicentre application study to assess a polyester-tulle primary wound dressing with hydrocolloid particles in terms of usability as well as user and patient satisfaction. Poster presented 24th Conference of the European Wound Management Assocociation (EWMA-GNEAUPP 2014) May 2014 Madrid Spain.

ReadyWrap® The easy solution for self-care

Garments include: Toe, foot, knee, calf, thigh, extender wrap.

ReadyWrap® is better for patients

Easy to use, with colour coded VELCRO® fasteners.

- Front-fastening short straps aid patient application and readjustment.
- Overlapping straps minimise user application error and can prevent undue loss of pressure if the patient does not apply the product perfectly.
- Low-profile design, allowing patients to wear their usual footwear.
- All products are available in black or beige.

ReadyWrap® is clinically effective

Short stretch properties - Therapeutic working and tolerable lower resting pressure.

- Positive outcomes for leg ulcers, chronic oedema and lymphoedema patients.
- Effective in the management of recurrent swelling (oedema) and ulceration.
- Excellent Static Stiffness Indices, similar to inelastic bandages.
- 50% overlapping straps prevent gapping and can accommodate changing limb circumference to contain and control oedema.

ReadyWrap is cost-effective

ReadyWrap® can provide cost savings associated with:

- Time saved due to quicker and easier application of the device, in comparison to compression bandages.
- Reduced use of bandaging materials – ReadyWrap can be washed and reused over a period of six months.
- Reducing clinic visits due to self-care at home.
- Educing nursing time as it can be easily applied by the patient or their carer.

Vliwasorb® Sensitive Border
superabsorbent wound dressing

Superabsorbent wound dressing with silicone border designed to manage high levels of exudate, and retention with a gentle silicone wound contact layer. It helps protect both the wound and surrounding skin, reducing the risk of maceration and supports progression towards healing.

Ordering Information

Vliwasorb Sensitive Border (10 singles)
Individually sealed and sterile

Size	Order Code
10 x 10	159558

20 x 25	159562
Sacrum 23 x 23	159569

Vliwasorb® Pro Highly conformable dressing for highly exuding wounds

Did you know?

Vliwasorb® Pro may be used as a primary wound dressing - it's integrated wound contact layer negates the need to use an additional contact layer underneath - saving budget.

The structure of Vliwasorb® Pro
